Complete Compost

The natural way to recharge lawns & gardens

Complete Compost is the safe and eco-friendly way to achieve healthy, nutrient-rich soils. Our bagged Complete Compost is approved for use on organic farms by Vermont Organic Farmers (VOF), so you can feel good knowing that it is safe for your lawn, garden and ecosystem. Great compost is the way to great soil, and there's no better way to build great soil than with Complete Compost.

Carefully crafted

Each batch of Complete Compost is carefully crafted, tightly monitored, and fully cured to ensure the highest levels of quality and consistency. Our new facility features an aerobic process, which yields drier, more finely screened material with superior feel and spreadability.

Formulated to build soil structure and health

Complete Compost is the cure-all for tired, compacted soils. It increases a soil's ability to hold nutrients and makes those nutrients more readily available to plants. Amending soil with Complete Compost improves soil structure, reduces soil compaction, and increases air filtration, resulting in healthier root formation. Multitudes of micro-organisms in our compost help suppress plant disease and pest infestation.

Multi-ingredient Recipe

Complete Compost is made from a diverse mix of ingredients, which means it contains a greater variety of beneficial organisms than most other brands.

Ingredients:

- Horse, chicken, and cow manures from local farms
- Food scraps from businesses and residents
- Coffee grounds and chaff, and other leftovers from local food manufacturers
- Burlap
- Leaves and yard clippings
- Wood chips

Available in 8 quarts, 20 quarts and bulk*

**Green Mountain Compost's bagged products are approved for organic use. Bulk compost and topsoil are not approved for organic use due to inclusion of compostable plastics in the recipe.*

Water less, weed less, fertilize less!
Complete Compost saves time & money by letting Mother Nature do the work.

Best Uses for Complete Compost

- Soil-building for farms and gardens
- Fortifying lawns • Landscaping
- Mulching • Custom growing mixes

A product for every need

We mix our compost into a variety of products, formulating each to meet the specific needs of our customers:

- **Premium Topsoil** Rich, sandy loam high in organic matter that builds safe, lush lawns and garden beds
- **Premium Potting Soil** Professional grade, all-purpose soil that offers a perfect balance of texture, moisture retention, and drainage
- **Seed Starter mix** A high-performance blend that promotes early root and shoot vitality
- **Raised Bed Mix** Adds structure, microbes, nutrients, and minerals to enable plants to thrive in an environment isolated from native soil
- **Custom Blends** Tree & shrub mix, green-roof medium, and other custom blends available
- **Mulches** Plain, undyed, locally produced pine bark or compost-enriched Microbe Mulch

*"Landshapes
has been using Green
Mountain Compost on all of our
residential and commercial installations
through Vermont & Nantucket since the 90's.
We have come to expect positive results from our
planting beds and we know that Green Mountain
Compost is a quality product we can depend on."*

Compost analysis

ANALYSIS	RESULT
pH	7.8
Organic matter content	38%
Moisture content (dry weight)	57%
Nitrogen	1.2%
Phosphorus	0.7%
Potassium	0.8%

Compost application rates

1 bag of Complete Compost = 0.66 cubic feet
 42 bags = 1 cubic yard

APPLICATION DEPTH	COMPOST NEEDED PER 100 SQ. FT.
1/2"	7 bags
1"	14 bags
3"	42 bags

Or use this formula:

$\text{___ square feet} \times \text{___" in depth} \times 0.0031$ $= \text{___ cubic yards of compost}$
--

All compost is screened to 3/8".

WE SELL PRODUCTS APPROVED FOR ORGANIC USE.

"Our customers absolutely love it. We have gardeners digging into the bulk pile to bag it themselves. The compost is beautiful material: black, very uniform and clean. In my own garden, soil structure was so improved once tilled that weeding was easy all summer, and the plants' response is tremendous."

D.B., Burlington, VT
