Premium Topsoil

A compost-based sandy loam for safe, lush lawns & beds

Green Mountain Compost Premium Topsoil can help make any lawn or garden a success with its superior drainage and nutrient-holding capacity. Formulated with Complete Compost as its base, Premium Topsoil contains the organic material that plants need to flourish. Green Mountain Compost bagged Premium Topsoil is approved for use on organic farms by Vermont Organic Farmers (VOF), so you can feel good knowing that it's safe for your lawn, garden and ecosystem.

High in organic matter

Green Mountain Compost Premium Topsoil contains at least 10% organic matter. With so many substandard topsoils on the market, you can feel confident knowing that our topsoil is carefully and consistently manufactured with high-quality ingredients for superior results.

Fine texture

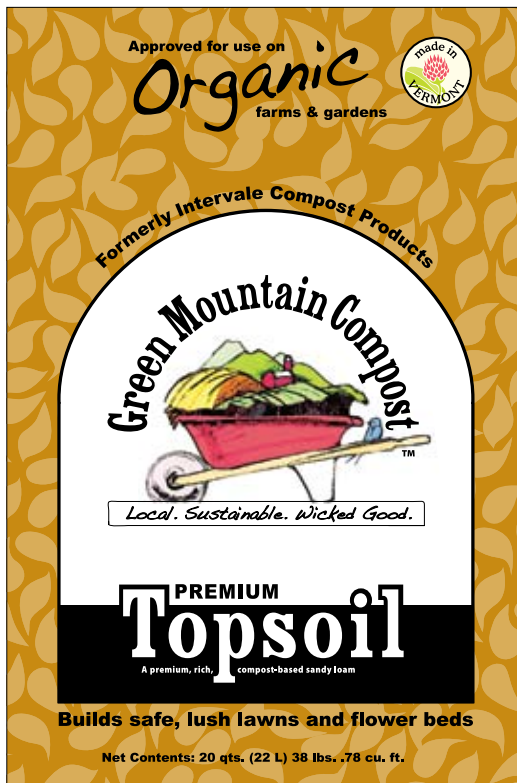

The new Green Mountain Compost facility features an aerobic process which yields drier, more finely screened material with superior feel and spreadability. Our Premium Topsoil is screened to 3/8".

Best uses for Premium Topsoil

- Filling garden beds
- Planting and fortifying lawns
- Landscaping

Premium Topsoil ingredients:

- GMC Complete Compost
- Mineral Soil
- Sand

Available in 20 quarts and bulk*
